

Science Lab Safety Instructions Mrs. Gingerich's Class

- 1. Follow all directions carefully and exactly! Never do anything you are not told to do!** If you have questions, **Ask!**
- 2. Never touch lab supplies without permission!** Materials are not to be handled by students until they have received directions.
- 3. Absolutely no horseplay during labs and activities:** people can get hurt and equipment gets broken.
4. It is your responsibility to clean up your lab area and put equipment away. **The lab area must be completely clean and materials put away before anyone leaves.**
5. It is your responsibility to take care of lab materials. **You break it – you pay for it!**
6. If you are absent on a lab day, it is **your responsibility to make it up!** You have 2 days to make up labs

➤ **In short...**

- **Be safe**
- **Use good judgement**
- **Use common sense**

** Labs are a privilege. The labs are crowded and equipment is expensive. Failure to follow lab rules may result in the loss of lab privileges and / or you will receive a loss of points. **
